## BIOGRAPHY

Composer and orchestrator Mark Buys is based in Australia, but his work - creating music for Film, TV, Games, Live Entertainment and Music Theatre - takes him around the globe. His stylish original music, born from his classical music background, combines the richness and variety of the orchestra with the unique characteristics of other genres and cultures.

Over the years Mark has worked with a variety of acclaimed composers, such as Christopher Young, Johan Soderqvist, Heitor Pereira, Brian Cachia and Kostas Christides; and his orchestrations have been performed and recorded by international orchestras worldwide. It is because of his wide knowledge and experience of classical, contemporary and indigenous musical styles that he is regularly engaged as an additional composer to broaden the musical vista of diverse screen creations and live entertainment ventures.

During Mark's 3-year residency in Hollywood he worked in some of the most prestigious film music studios, including Remote Control Productions (Hans Zimmer) and Ilsley Music (Christopher Young), supporting and contributing to major projects encompassing Film, TV, Games and production music.

Mark's arrangements for live entertainment and music theatre include work for composers like Stephen Schwartz; and his 'Off Broadway' orchestrations earned him an 'Honorable Mention' at the New York Music Theatre Festival.

In addition to his work as a composer and orchestrator, Mark has a strong commitment to the training of young musicians and composers. He frequently lectures in Orchestration, Film Scoring, Music Technology and Interactive Composition, and he has been a guest lecturer on these subjects in the USA.
